2nd European Summer School on Fuzzy Logic and Applications is an event promoted by the European Society for Fuzzy Logic and Technology. The school is addressed to PhD students and young researchers. The aim is to introduce the core aspects and recent developments of Fuzzy Logic and related applications.

It will consist of several courses, which will be held by world-leading experts in the field.

The key aspect of the school will be the communication and collaboration among the participants and the lecturers, by giving time for discussions to the aim of generating a fruitful ground for exchanging knowledge.

Students are invited to present their current work (either the PhD thesis proposal or any other research activity) by giving a short presentation or by preparing a poster.

The school will take place in a hotel situated in Beskydy mountains near Ostrava (Czech Republic) to provide participants with manifold surroundings.

The school is considered to be a low cost event where the registration fee includes:

- accommodation (5 nights)
- full board (5 days)
- social programme
- coffee breaks
- local transportation support.

Eusflat offers eight grants donating the registration fee to PhD students that are Eusflat members.

SFLA is supported by the Visegrad Standard Fund No. 21520043 www.visegradfund.org
